

# Special Educational Needs and Disabilities (SEND) Strategy 2022 – 2025 Goals

The SEND Strategy is a plan that tells you how we will help children and young people with SEND to have better lives.

We have 5 goals we want to complete in 2022 – 2025.

Below we will tell you the 5 goals and how we will reach them.

## 1. Tailoring

We will plan and create services that fit around your individual needs.

### How we will do this:

- Have a range of good local services that are flexible and available fast.

- Listen more to what you and your family needs.

- Create plans for young people that focus on what they can achieve.

**This will mean that:**

- You feel safe and listened to.

- You know what services are around who can help.

## 2. Enabling

We will make sure that the people who help you have all the learning they need.

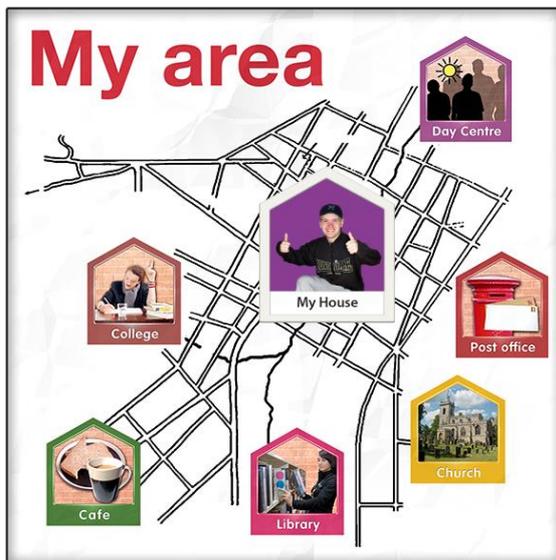

## How we will do this:

- Make sure that all professionals listen to you.
- Make sure that your needs are always the most important thing.
- Make sure that all professionals and families get the training they need.

## This will mean that:

- You feel confident and happy about the services you receive.
- Professionals understand how to help you and what support to request.

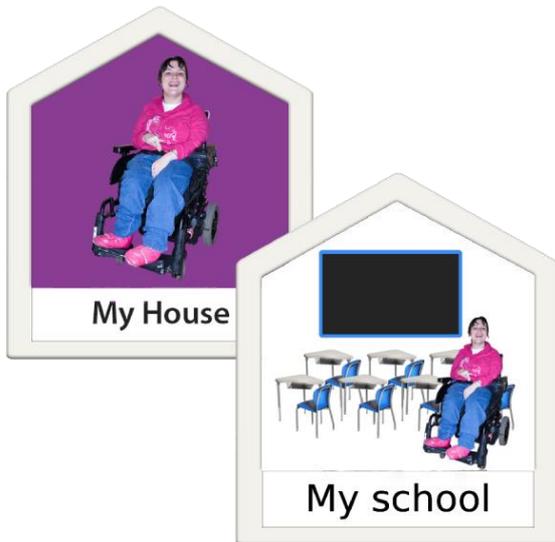

### 3. Provision

We will make sure that there is the right support for you in your local area.

#### How we will do this:

- Make it easier to get help from health, education and social care services.

- Give more support to young people who are not in school.

Make sure young people with complex medical needs can go to school or college near to their homes.

For example, by using technology to help local schools teach pupils with.

**This will mean that:**

- you can get the right help at the right time.

- Professionals plan your support and plan your support for the future too.

- You feel like a part of your community and feel safe and supported.

## 4. Collaborating

We will work together with other organisations to deliver services.

1 assessment of need

### How we will do this:

- Make sure you can have one assessment for support and then get help from all the services you need.

- Services in health, education and social care will all talk and work together.

This is so everyone knows what is happening.

- Make sure you can give your feedback on services and work with us to improve them if you want to.

### **This means that:**

- You and your family understand what each service does and how they help.

- You do not get put on long waiting lists for support.

## 5. Succeeding

We will support all children and young people to be successful and happy in their lives.

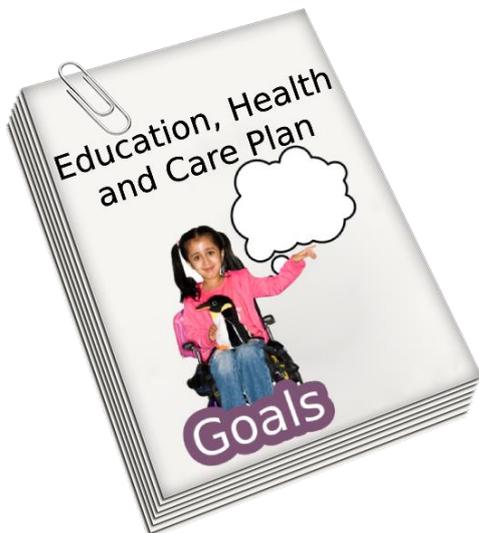

### How we will do this:

- Make sure there is good support for your mental health.

This is your SEN Officer calling to tell you about your child's Education, Health and Care Plan.

- Make sure there are lots of fun and positive activities for you and other young people to experience.
- Make sure services always keep in touch and tell you what is happening.
- Make sure that education, health and care plans always have the young person's goals included.

- Have extra learning support for people who need a bit more help.

**This will mean that:**

- You feel happy and included.

- You feel supported to achieve your goals.
- Everyone works together to give you the support you need.
