

Maths

Spring 1

Year 4

English

In maths we applied our problem solving strategies, including RUCSAC, to questions based on measures. We measured height, weight and time.

We also looked at geometry and spent our lessons investigating the properties of different shapes. We learnt new vocabulary such as perpendicular, faces and vertices.

Athenians

Paragraph one

I'm writing to tell you that the Athenians way of life is much more peaceful than that of Spartans who are always fighting. Athenians live close to the sea and can easily trade whereas Spartans live inland which made trades more difficult.

Topic

We have really enjoyed our science topic 'States of Matter'. It inspired lots of children to do their own experiments at home. Some made the most of the cold weather and froze water. Whereas, some combined their science knowledge with their baking skills and changed liquid batters into solid cakes and solid chocolate into tasty liquid icing.

In History, we studied the Ancient Greeks. We looked at their way of life, the art work they created and the impact they have had on our current democracy.

PSHE lessons taught us about staying safe and we role played calling the emergency services. We also considered our mental health and the importance of staying positive.
