### Breaking News - Discoveries at Sutton Hoo!

Archaeologist Basil Brown has found a 27m long ship in a burial mound.

Mrs Pretty, (the land owner) was the one who wrote to Basil Brown in 1938 at Sutton Hoo.

Basil Brown excavated one of the mounds in 1938 which had the 27m long ship.

Basil Brown has said "As an archaeologist you need to be able to tell what's under with your nose."

The excavations took place in 1939 before World War 2. The ship was buried with the king in a burial chamber.

One of the burial mounds at Sutton Hoo

Basil Brown said, "If Mrs Pretty hadn't hired me for the job than I wouldn't have got the name for finding the ship."

Under the burial mounds that were excavated, they found an Anglo-Saxon iron helmet a whale casket, a sword and a burial chamber.

Anglo-Saxon helmet worn at war.

Mrs Pretty said "I appreciate what Mr Brown has done in terms of digging the mounds."

# Spring Term Update

It's been a busy term for both children in school and children working at home. In History, we have been learning about the Anglo-Saxons and this has been linked to our English - we learned about Sutton Hoo and wrote newspaper reports about the discoveries there. In maths we have completed work on fractions, position and direction (co-ordinates), Roman Numerals and angles. Science has been about materials - we've been learning about solids and liquids and reversible and irreversible changes.

In Science, we mixed different liquids and observed what happened!

We made Fractions Walls out of different materials at home.

Children at home made paper aeroplanes and find out which designs fly the furthest
